ABSTRACT

Statistical data are provided on enrollment, instructional programs, financial support, and student characteristics for the 1973-1974 school year of the 13 community colleges that comprise the University of Kentucky Community College System. The data show: (1) a total head-count credit enrollment of 12,942 students, representing a numerical increase of 665 and a percentage increase of 5.4 over the fall of 1972; (2) 7,755 (59.9 percent) of the students were working in the transfer program and 5,187 (40.1 percent) were enrolled in the technical program; (3) the Community College System is almost completely supported by appropriations of the state legislature; including funds budgeted for capital outlay and auxiliary services, the total budgeted expenditures for the community college programs were $9,231,316; and (4) the mean composite ACT scores varied from a high of 18.8 to a low of 16.0, with a mean composite for the system of 17.6; the mean composite score was higher for men than for women; 15 percent of the students had incomes of $6,000 or below; and 89 percent were Caucasian and 10.3 percent were Afro-American. Twenty-eight tables provide the data. (DB)

DEVELOPMENT OF THE COMMUNITY COLLEGE SYSTEM

In 1962 the General Assembly of Kentucky, through the leadership of Governor Bert T. Combs, enacted legislation mandating the formation of a system of community colleges and entrusted the Board of Trustees of the University of Kentucky with the operation of such a system. At the same time, the legislature recommended five sites for future colleges.

The two factors responsible for the operation of the system being given to the University of Kentucky Board of Trustees were first, the recognition that as the governing board of the state's land grant university, the University of Kentucky Board of Trustees already had responsibility for the planning and operation of state-wide programs and secondly, recognition of the existence of the five extension centers then being operated by the University of Kentucky. Between 1948 and 1962, the University of Kentucky had opened four extension centers at Covington, Cumberland, Fort Knox, and Henderson, and assumed the responsibility of the municipally run Ashland Junior College.

In creating a system of community colleges, the 1962 General Assembly abandoned the extension center philosophy of the program then operated by the University of Kentucky and committed the state to a comprehensive community college program. A three-fold function of career-oriented technical programs, pre-baccalaureate education, and adult-continuing education was called for in the enabling legislation.

In July 1964, the University of Kentucky, guided by the leadership of its sixth president, Dr. John W. Oswald, provided for both the operation of a University System and a Community College System under the Board of Trustees. The Community College System operates as an autonomous system with the determination and administration of its academic programs being separate from that of the University System. The chief administrative officer of the Community College System is the Vice President for the Community College System, who is directly responsible to the President of the University.

Also, in 1964, new community colleges opened at Elizabethtown and Prestonsburg, bringing the total number of campuses under the new system to seven. Total enrollment that fall was 2,876 students; an increase of 67 percent over the previous year.

The Community College System continued its growth in all respects after 1964. After studies of the need for additional community colleges in 1965 and 1967, recommendations concerning criteria to be used in establishing new community colleges, made to the University of Kentucky Board of Trustees, were adopted and submitted to the Council on Public Higher Education - the state's coordinating and planning body for public institutions of higher education. Acting on its recommendation, the General Assembly amended the Community College Act to recognize the Lexington Technical Institute, which had been operating on the University

campus since August 30, 1965; and to authorize new community colleges at Louisville and Maysville in 1966, one at Hazard in 1967, and the last one at Madisonville in 1968. These latter four units were subsequently established and opened for students in 1968.

In July 1968, Paducah Junior College, a municipally-operated college founded in the 1930's, joined the Community College System as Paducah Community College. This brought to fifteen the number of units then operating under the University of Kentucky Board of Trustees.

In January 1970, the General Assembly of Kentucky, recognizing the need for additional higher education opportunities in the Northern Kentucky area, authorized the creation of a new four-year state college, Northern Kentucky State College. The facilities of the Northern Community College, operated since 1948 by the University of Kentucky were, as of July 1, 1970, transferred to the administrative control of the newly-formed Northern Kentucky State College. This reduced to fourteen the number of units operating under the University of Kentucky Community College System.

Effective with the 1972 Fall Semester, the Fort Knox Community College was changed to a four-year residence instruction center and assigned to the administrative control of the University of Kentucky Vice President for Academic Affairs. Also in the Fall 1972, two sub-units began operation: one associated with Jefferson Community College and the other with Hopkinsville Community College. The

Southwest Campus of Jefferson Community College was opened in response to the request for more educational opportunities made by the citizens of the Southwest section of Jefferson County. The operation is temporarily housed in a high school operating in the evening hours and serving primarily part-time students. The second sub-unit is Eagle University, located at Ft. Campbell, Kentucky. Eagle University is a consortium of several institutions of higher learning including Hopkinsville Community College which offers educational programs on the military base at Ft. Campbell.

In 1968 the General Assembly authorized the establishment of two additional community colleges, at Glasgow and Carrollton; however, funds have not yet been appropriated for their activation.

SECTION I

ENROLLMENT

The number of students enrolled in the University of Kentucky Community College System during the 1973 Fall Semester is presented in Tables 1 through 3, and an enrollment history is presented in Tables 4 and 5.

The total head count credit enrollment of 12,942 students is shown in Table 1 for the thirteen community colleges operating during the fall of 1973. This enrollment represented a numerical increase of 665 and a percentage increase of 5.4 over the fall of 1972. Of the total enrollment 9,927 were freshmen (77%) and 3,015 were sophomores. The ratio of freshmen to sophomores remained relatively unchanged from the previous three years and is typical of most community colleges, in that the retention rate of sophomores is generally low. Nearly 55 percent of the freshmen and 67 percent of the sophomores were enrolled as full-time students. This represented a decrease of 5.0 percent for freshmen and 2.0 percent for sophomores over full-time enrollments in 1972.

The number of men and women enrolled is shown in Table 2. Of the students enrolled 6,856 (53%) were men and 6,086

were women. This represented a change from 1972 when 49 percent of the students were men and reverses the trend of a drop in male enrollment which occurred after the conclusion of compulsory military service. Nearly 57 percent of the men were enrolled as full-time students, while 58 percent of the women were enrolled on a full-time basis. This was a decrease from 1972, when 64 percent of the men and 60 percent of the women were enrolled full-time. Since 1971 the percentage of full-time males and female enrollments has been declining.

The number of students enrolled in the Community College System by place of residence is shown in Table 3. In 1973 only 218 were non-residents of Kentucky. This means that 98 percent of those students receiving credit instruction in the 1973 Fall Semester were Kentucky residents.

Enrollment History

Table 4 and 5 present a history of enrollment in the University of Kentucky Community College System. Table 4 shows the head count enrollment since 1964, while Table 5 provides similar information as to the full-time equivalent enrollment.

Since 1964 when the System was created, credit enrollment has increased from 2,876 students in seven colleges to 12,942 students in thirteen institutions. In nine years, this has meant a numerical increase of 10,066 students and

a percentage increase of 350. Nearly 84 percent of this growth has occurred in the eight colleges started after 1964 and the five remaining original colleges now account for only 27 percent (3,471 students) of the total enrollment as of Fall 1973. Jefferson Community College and its branch in Louisville now account for 34 percent of the total enrollment in the System.

Table 5 indicated the full-time equivalent credit enrollment for the period 1964-1973. The full-time equivalent (FTE) computation is based on the total credit hours for which students are enrolled, divided by 15. The total FTE credit enrollment for the Fall of 1973 was 8,931. This is a numerical increase of 467 over the Fall 1972 enrollment and represents a percentage increase of 5.5.

Since 1964 the FTE credit enrollment of the thirteen colleges has increased from 1,391 to 8,931, indicating a growth of 542 percent.

SECTION II

INSTRUCTIONAL PROGRAMS

The University of Kentucky Community College System is committed to the development of a comprehensive educational program with increased emphasis upon two-year technical programs which prepare for job entry. Information relating to the distribution of enrollment between the transfer and technical programs is provided in Tables 6 through 12. The number of graduates in these programs is detailed in Tables 13 through 15. Table 16 provides information pertaining to the library holdings which support the instructional programs. An analysis of the degrees held by the full-time teaching faculty is found in Table 17.

An analysis of the program, transfer and technical, is shown in Tables 6 through 11. As shown in Table 6, 7,755 (59.9%) of the students are working in the transfer program while 5,187 (40.1%) are enrolled in the technical program preparing for job entry at the end of two years. The number of students enrolled in the technical program represents a significant change from 1971 when nearly 68 percent of the students were enrolled in the transfer program and only 32 percent in the technical. In the four-

year period from 1969 until 1973, enrollment in the technical programs has increased from 21 percent of the total to 40.1 percent reflecting the increased emphasis being placed on career education programs in the Community College System. Table 7 illustrates the program enrollments and percent of change over 1972 for each of the colleges.

Of the students working in the transfer programs, 4,722 (60.9%) are men and 3,033 are women. A comparison of Tables 8 and 9 indicates that on a percentage basis, more men are enrolled in the transfer program than in the technical program and the percent of men enrolled in transfer programs has increased nearly 4 percent from 1972. Of the 5,187 students in the technical program, 2,131 (41.6%) are men while 3,056 (58.9%) are women. This represents a small increase (3.6%) in the number of male students in technical programs.

Table 10 presents the full-time equivalent enrollment by program. The FTE is computed on the number of credit hours taken by students divided by 15 which is the full-time equivalent figure established by the Kentucky Council on Public Higher Education. Of the 8,931 FTE students, 6,621 (74.1%) are in the transfer program while 2,310 (25.9%) are in the technical program. This is an increase of 5.2% in technical FTE enrollment over the fall of 1973. The variance between the 5,187 students enrolled in the technical program (Table 6) and the 2,310 FTE enrollment is

attributed to the fact that approximately one half of the course work in the technical program consists of general education courses which are counted the transfer program FTE's. This variance can also be seen in Table 11 which provides a summary of the number and percent of credit hours offered on which the FTE figure is based in these program areas for each of the fourteen colleges. Seventy-four percent of the credit hour load is in the transfer program. The remaining credit hours (25.9%) are in the technical classes created especially for the two-year Associate in Applied Science degrees. In addition, there are instances where a course classified as transfer is utilized for technical credit in an Associate in Applied Science program yet the enrollment of the course counts toward the transfer FTE's.

Table 12 indicates the full-time equivalent credit enrollment for the period 1971-1973. An analysis of the figures shows that the FTE enrollment in technical courses has increased from approximately 15.6 percent of the total enrollment in 1971 to over 25 percent in 1973. This increase in the technical programs again reflects the emphasis placed on these programs through the System as a comprehensive community college program is implemented.

An analysis of those students graduating from the University of Kentucky Community College System is shown in Tables 13 through 15. The three associate degrees are awarded to students who successfully complete with a "C"

average a specified curriculum, all of which have a minimum of 64 semester hours. The Associate in Applied Science is awarded in the technical areas. The Certificate of College Studies is awarded to students who have successfully completed sixty semester hours with a "C" average. Table 13 indicates that of the 1,213 students who received an Associate Degree in the 1972-73 academic year, 562 (46.3%) were in the transfer area while 651 (53.7%) were in technical programs. This marked the first year that more degrees were awarded in the technical areas than in the transfer.

The specific programs in which the Associate in Applied Science Degrees were given are shown in Table 14. Of the more than forty technical programs offered in the Community College System, twenty-six had graduates in 1972-73. The appropriate HEGIS numbers are used to indicate the fields. Of the technical degrees, 250 (38.4%) were in Nursing amd 114 (17.5%) in Secretarial Science. In terms of the broad curriculum areas, the Allied Health area dominated with 342 (52.5%) of all the degrees.

A history of the number of degrees and certificates awarded in the University of Kentucky Community College System from 1970 to 1973 is presented in Table 15. Between 1970 and 1973, the number of degrees awarded increased by 1,079 while the number of certificates increased by 5.

Table 16 presents information relating to the number and type of library materials supporting the instructional programs. Approximately 27,829 volumes were added during 1972-73 to bring the total volumes to 259,100. Three institutions, Hopkinsville, Madisonville, and Paduch, are developing sizable collections of microfilm and other microform (non-print) materials.

An indication of the educational level of the full-time teaching faculty is shown in Table 17. Of the 408 faculty members, the majority (76%) have a Masters Degree while 33 (8%) have a Doctorate and 67 (16%) have a Bachelors or less.

SECTION III

Financial Support

An analysis of information concerning the financial support of the University of Kentucky Community College System is presented in Tables 18 through 22. Nationally, community/junior colleges have three major sources of revenue - local tax support, student fees, and state support - for operational funds. The University of Kentucky Community College System, however, is almost completely supported by appropriations of the state legislature. While two of the colleges do have the benefit of local tax support, this income has been committed for site acquisition in the case of Ashland Community College and for program enrichment at Paducah Community College. Only at Paducah do the funds actually provide operational funds. The student fees of $195.00 per semester for a full-time state resident and $490.00 for a full-time non-state resident have been pledged to retire an eighteen million dollar bond issue which is currently being used for construction projects throughout the System. Since these two sources of potential operating revenue are not provided for general educational purposes, the state appropriation becomes the major source of financial support for operating purposes.

The actual operating expenditures by major category for each community college for 1972-73 are shown in Table 18 and the percentage analysis by category is shown in Table 19. During 1972-73 $6,582,973 was expended in general educational funds for an FTE student enrollment of 8,464. This is an average expenditure of $778.00 per FTE student. The addition of auxiliary services and capital construction funds brought the total expended to $7,253,159 for 1972-73.

A percentage analysis of the expenditures for general education purposes is shown in Table 19. The percentage expenditure for instruction ranges from a low of 40.2% at Hazard to a high of 76.6% at the Lexington Technical Institute.

Information on the budgeted operating expenditures for 1973-74 is shown in Tables 20 and 21. For 1973-74, a total of $8,093,381 was budgeted for general educational operational support. It should be noted that neither the Commonwealth of Kentucky nor the University of Kentucky has a stated policy of a fixed dollar support per FTE student. Including the funds budgeted for capitol outlay and auxiliary services, the total budgeted expenditures for community college programs was $9,231,316 for 1973-74.

Two aspects of the Community College System general education expenditures are omitted from these tables: the first is the indirect administrative costs and fringe benefits for the Community College System within the University of Kentucky Lexington Campus budget. Certain administrative functions, in the business and fringe benefits area, are

handled for the System through the Lexington Campus. Cost estimates of this have been listed at $900,000 per year. In addition, debt service for the recent construction program for the community colleges is carried as a separate budget item. For 1972-73 the debt service was $1,353,150 and was budgeted at $1,353,150 for 1973-74. Taking these indirect costs into consideration would raise the average FTE expenditures to $1,044.00 for 1972-73.

Information concerning the average faculty salaries for each community college is shown in Table 22. The Community College System has only recently implemented a four level rank system and at the present time there are no full professors in the system. The average salaries do not include fringe benefits and are for a ten-month contract.

SECTION IV

STUDENT CHARACTERISTICS

An indication of the academic characteristics of first-time freshmen in the University of Kentucky Community College System is represented by the scores on the American College Test. The American College Test is required of all entering students who have no previous college work. The ACT Test is a national achievement test which yields standard scores in the areas of English, mathematics, social sciences, natural science, and a composite score. It is used by all the public institutions of higher education in the state as a counseling and placement device.

The mean standard scores for each of the four tests and the composite score for all entering students in the Fall 1973 is shown by college in Table 23. A total of 2,649 students were included in the results. The mean composite ACT score varies from a high of 18.8 at Hazard Community College to a low of 16.0 at Southeast Community College. The mean composite of 17.6 for the System as a whole is lower than the mean composite of 19.3 for the eight public senior institutions of higher education in the state. The differences between male and female students

is shown in Table 24 and Table 25. The mean composite score is higher for men than women. A comparison of the mean scores for community college students since 1967 can be seen in Table 26.

Information concerning the estimated family income is found in Table 27. Nearly five percent of the students reported less than $3,000 annual income, while 10.0% reported an annual income between $3,000 and $5,999. Thus, approximately fifteen percent have incomes of $6,000 or below.

The ethnic background of the students enrolled in the Community College System is found in Table 28. The overwhelming majority of the students are Caucasian (89%) with the next largest ethnic group being Afro-American (10.3%). Since 1971 the Afro-American enrollment has increased from 6.6% to 10.3% of the total.
